

AXCAN PHARMA

Interim Report

Second Quarter
March 31, 2006

Q2

OUR EXPERTISE

Focus on gastroenterology, our core area of knowledge

OUR PEOPLE

Foundation of our future success

OUR PIPELINE

Promise for better treatments

Dear Fellow Shareholders:

“We are delighted to report another strong quarter that once again highlights the financial and operational strength of the Company. Axcan’s second quarter results continue to demonstrate the solidity of our base business, which we believe will in turn allow us to accelerate future growth.”

Frank A.G.M. Verwiel, M.D.
President and Chief Executive Officer

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

This discussion should be read in conjunction with the information contained in Axcan's consolidated financial statements and the related notes thereto. All amounts are in U.S. dollars.

OVERVIEW

Axcan is a leading specialty pharmaceutical company concentrating in the field of gastroenterology, with operations in North America and Europe. Axcan markets and sells pharmaceutical products used in the treatment of a variety of gastrointestinal diseases and disorders. The Company seeks to expand its gastrointestinal franchise by in-licensing products and acquiring products or companies, as well as developing additional products and expanding indications for existing products. Axcan's current products include ULTRASE, PANZYTRAT and VIOKASE for the treatment of certain gastrointestinal symptoms, related to cystic fibrosis in the case of ULTRASE and PANZYTRAT; URSO/URSO 250, URSO FORTE/URSO DS and DELURSAN for the treatment of certain cholestatic liver diseases; SALO FALK and CANASA for the treatment of certain inflammatory bowel diseases; and CARAFATE/SULCRATE for the treatment of gastric duodenal ulcers. Axcan has a number of pharmaceutical projects in all phases of development, including ITAX for the treatment of functional dyspepsia.

Further to budgetary initiatives implemented by the French government, which resulted in the delisting of a number of pharmaceutical products from government formularies, including LACTEOL, and re-pricing of other pharmaceuticals, including TAGAMET and TRANSULOSE, according to the reference pricing guidelines set forth in the TFR ("*Tarif Forfaitaire de Responsabilit *"), management has taken these factors into consideration when reviewing the appropriate carrying value of its French subsidiary's intangible assets with a finite life associated mainly with TAGAMET and TRANSULOSE. As such, the Company's earnings for the quarter include a one time charge in the amount of \$5.8 million for the write-down due to the partial impairment of the carrying value of these assets. The charge is equal to the excess of the carrying value of intangible assets, including items such as trademarks and other capitalized costs associated with these products over the estimated value of cash generated by the same products once adjusted for the effects of these legislative changes.

In connection with a reorganization of its international operations due to these budgetary initiatives implemented by the French government, the Company has also undertaken steps which seek a reduction of its current workforce in Europe. To this end, on May 2,

2006, the Company's French subsidiary communicated a reorganization plan to the employee representatives in France aimed at reducing its workforce. If this plan is implemented, it should allow our European infrastructure to focus its activities on the sales and marketing of its products to gastroenterologists. We also anticipate recording one time restructuring charges of approximately \$1.5 million in the third quarter of fiscal 2006. This has been disclosed as a subsequent event note in the Company's quarterly financial statements. In order to adopt and implement the restructuring plan, the management of the Company's French subsidiary will comply with local legislation, which includes a consultative process of the employee representatives. The charge to earnings for the cost of the plan includes such items as transition assistance, legal, cash severance costs to its affected employees as well as other administrative charges.

Axcan reported revenue of \$72.8 million, operating income of \$12.7 million and net income of \$8.3 million for the three-month period ended March 31, 2006. For the six-month period ended March 31, 2006, revenue was \$143.4 million, operating income was \$26.9 million and net income was \$17.6 million. Revenue from sales of Axcan's products in the United States was \$96.2 million (67.1% of total revenue) for the six-month period ended March 31, 2006, compared to \$78.5 million (62.8% of total revenue) for the corresponding period of fiscal 2005. In Canada, revenue was \$19.3 million (13.5% of total revenue) for the six-month period ended March 31, 2006, compared to \$16.9 million (13.5% of total revenue) for the corresponding period of fiscal 2005. In Europe, revenue was \$27.8 million (19.4% of total revenue) for the six-month period ended March 31, 2006, compared to \$29.5 million (23.6% of total revenue) for the corresponding period of fiscal 2005.

Axcan's revenue historically has been and continues to be principally derived from sales of pharmaceutical products to large pharmaceutical wholesalers and large chain pharmacies. Axcan utilizes a "pull-through" marketing approach that is typical of pharmaceutical companies. Under this approach, Axcan's sales representatives demonstrate the features and benefits of its products to gastroenterologists who may write their patients prescriptions for Axcan's

products. The patients, in turn, take the prescriptions to pharmacies to be filled. The pharmacies then place orders with the wholesalers or, in the case of large chain pharmacies, their distribution centers, to whom Axcan sells its products.

Axcan's expenses are comprised primarily of selling and administrative expenses (including marketing expenses), cost of goods sold (including royalty payments to those companies from whom Axcan licenses some of its products), research and development expenses as well as depreciation and amortization.

Axcan's annual and quarterly operating revenues are primarily affected by three factors: the level of acceptance of Axcan's products by gastroenterologists and their patients; the ability of Axcan to convince practitioners to use Axcan products for approved indications; and wholesaler buying patterns.

Historically, wholesalers' business models in the U.S. were dependent on drug price inflation. Their profitability and gross margins were directly tied to speculative purchasing of pharmaceutical products at pre-price increase prices and selling their product inventory to the trade at the new higher price. This inventory price arbitrage was predominantly how wholesalers were compensated for the distribution services they provided and had a dramatic effect on wholesaler buying patterns as they invested in inventories in anticipation of generating higher gross margins from price increases from manufacturers. More recently, for a number of reasons, pharmaceutical manufacturers have not been increasing drug prices as frequently and the increases as a percentage have been lower. For these and other reasons, some wholesalers moved to a fee-for-service type arrangement where fees are now typically expressed as a percentage of the wholesaler's purchases from the manufacturer or as an amount per piece or per unit. For wholesalers, fee-for-service means their compensation will be periodic and volume activity based as opposed to price increase based.

As a result of the move to a fee-for-service business model, many wholesalers are no longer investing in inventory ahead of anticipated price increases and are reducing their carrying levels of inventory from their historical norms. Under the new model, manufacturers

will now realize the benefit of price increases more rapidly and pay wholesalers for the services they provide on a fee-for-service basis. This change in wholesaler's business model has affected Axcan's revenue since fiscal 2005.

Most importantly, the level of patient and physician acceptance of Axcan's products, as well as the availability of similar therapies, which may be less effective but also less expensive than some of Axcan's products, impact Axcan's revenues by driving the level and timing of prescriptions for its products.

CRITICAL ACCOUNTING POLICIES

Axcan's consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP"), applied on a consistent basis. Axcan's critical accounting policies include the use of estimates, revenue recognition, the recording of research and development expenses and the determination of the useful lives or fair value of goodwill and intangible assets. Some of our critical accounting policies require the use of judgment in their application or require estimates of inherently uncertain matters. Although our accounting policies are in compliance with U.S. GAAP, a change in the facts and circumstances of an underlying transaction could significantly change the application of our accounting policies to that transaction, which could have an effect on our financial statements. Discussed below are those policies that we believe are critical and require the use of complex judgment in their application.

USE OF ESTIMATES

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the recorded amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of financial statements and the disclosure of recognized amounts of revenues and expenses during the year. Significant estimates and assumptions made by management include the allowance for accounts receivable and inventories, reserves for product returns, rebates and charge-backs, the classification of intangible assets between finite and indefinite life, useful lives of long-lived assets, the expected cash flows used in evaluating long-lived assets, goodwill and investments for

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

impairment, contingency provisions and other accrued charges. These estimates were made using the historical information and various other factors related to each circumstance available to management. The Company reviews all significant estimates affecting the financial statements on a recurring basis and records the effect of any adjustments when necessary. Actual results could differ from those estimates based upon future events, which could include, among other risks, changes in regulations governing the manner in which we sell our products, changes in health care environment and managed care consumption patterns.

REVENUE RECOGNITION

Revenue is recognized when the product is shipped to the Company's customer, provided the Company has not retained any significant risks of ownership or future obligations with respect to the product shipped. Provisions for sales discounts and estimates for chargebacks, managed care and Medicaid rebates and product returns are established as a reduction of product sales revenues at the time such revenues are recognized. These revenue reductions are established by us as our best estimate at the time of sale based on historical experience adjusted to reflect known changes in the factors that impact such reserves. These revenue reductions are generally reflected as an addition to accrued expenses.

We do not provide any forms of price protection to our wholesale customers and permit product returns only if the product is returned within 12 months of expiration. Credit for returns is issued to the original purchaser at current net pricing less 10%. Accrued liabilities include reserves of \$6.2 million and \$7.5 million as of March 31, 2006, and September 30, 2005, respectively for estimated product returns.

In the United States, we establish and maintain reserves for amounts payable by us to managed care organizations and state Medicaid programs for the reimbursement of portions of the retail price of prescriptions filled that are covered by the respective programs. We also establish and maintain reserves for amounts payable by us to wholesale distributors for the difference between their regular sale price and the contract price for the products sold to our contract customers. The amounts estimated to be paid relating to products

sold are recognized as revenue reductions and as additions to accrued expenses at the time of sale based on our best estimate of the product's utilization by these managed care and state Medicaid patients and sales to our contract customers, using historical experience adjusted to reflect known changes in the factors that impact such reserves. Accrued liabilities include reserves of \$10.4 million and \$4.8 million as of March 31, 2006, and September 30, 2005, respectively, for estimated rebates and chargebacks.

During the quarter, the reserve for product returns was decreased by \$1.6 million and the reserves for chargebacks and contract rebates were increased by a total of \$4.4 million as a result of a refinement in the method used in the calculation for such reserves. The refinement was implemented based on best industry practices as well as additional information available to the Company compared to prior periods.

If the levels of chargebacks, managed care and Medicaid rebates, product returns and discounts fluctuate significantly and/or if our estimates do not adequately reserve for these reductions of net product revenues, our reported revenue could be negatively affected.

GOODWILL AND INTANGIBLE ASSETS

We have in the past acquired products and businesses that include goodwill, trademarks, license agreements and other identifiable intangible assets. Axcan's goodwill and intangible assets are stated at cost, less accumulated amortization. Since October 1, 2001, the Company does not amortize goodwill and intangible assets with an indefinite life. However, management assesses the impairment of goodwill and intangible assets at least annually and whenever events or changes in circumstances indicate that the carrying amounts of these assets may not be recoverable, by comparing the carrying value of the unamortized portion of goodwill and intangible assets to the future benefits of the Company's activities or expected sales of pharmaceutical products. Should there be a permanent impairment in value or if the unamortized balance exceeds recoverable amounts, a write-down will be recognized for the current year. To date, Axcan has not recognized any significant impairment in value on goodwill and intangible assets with an indefinite life.

Intangible assets with finite life are amortized over their estimated useful lives according to the straight-line method at annual rates varying from 4% to 15%. The straight-line method of amortization is used because it reflects, in the opinion of management, the pattern in which the intangible assets with finite life are used. In determining the useful life of intangible assets, the Company considers many factors including the intention of management to support the asset on a long-term basis by maintaining the level of expenditure necessary, the use of the asset, the existence and expiration date of a patent, the existence of a generic or competitor and any legal or regulatory provisions that could limit the use of the asset. Axcan had not recognized any significant impairment in value of intangible assets with a finite life prior to the three-month period ended March 31, 2006 during which Axcan recognized a write-down of \$5.8 million on a French product line including TAGAMET and TRANSULOSE.

As a result of acquisitions, we included \$27.5 million of goodwill on our consolidated balance sheets as of March 31, 2006, and September 30, 2005.

Also as a result of acquisitions of product rights and other identifiable intangible assets, we included \$375.3 million and \$388.9 million as net intangible assets on our consolidated balance sheets as of March 31, 2006, and September 30, 2005, respectively. Estimated annual amortization expense for intangible assets with a finite life, which have a weighted-average remaining amortization period of approximately 17 years, for the next five fiscal years, is approximately \$15.4 million.

RESEARCH AND DEVELOPMENT EXPENSES

Research and development expenses are charged to operations in the year they are incurred. Acquired in-process research and development having no alternative future use is written off at the time of acquisition. The cost of intangibles that are acquired from others for a particular research and development project, with no alternative use, is written off at the time of acquisition.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, the percentage of revenue represented by items in Axcan's consolidated statements of operations:

	For the three-month periods ended March 31		For the six-month periods ended March 31	
	2006 %	2005 %	2006 %	2005 %
Revenue	100.0	100.0	100.0	100.0
Cost of goods sold	25.4	32.3	25.6	29.8
Selling and administrative expenses	31.4	33.1	32.4	33.5
Research and development expenses	10.0	13.1	11.3	11.8
Depreciation and amortization	7.8	8.4	7.9	8.6
Partial write-down of intangible assets	8.0	—	4.0	—
	82.6	86.9	81.2	83.7
Operating income	17.4	13.1	18.8	16.3
Financial expenses	2.4	3.0	2.4	2.9
Interest income	(1.3)	(0.5)	(1.2)	(0.3)
Gain on foreign exchange	(0.5)	(0.3)	(0.4)	(0.4)
	0.6	2.2	0.8	2.2
Income before income taxes	16.8	10.9	18.0	14.1
Income taxes	5.4	2.3	5.7	3.5
Net income	11.4	8.6	12.3	10.6

PERIODS ENDED MARCH 31, 2006 COMPARED TO PERIODS ENDED MARCH 31, 2005

REVENUE

For the three-month period ended March 31, 2006, revenue was \$72.8 million compared to \$63.4 million for the corresponding period of the preceding fiscal year, an increase of 14.8%. For the six-month period ended March 31, 2006, revenue was \$143.4 million compared to \$124.9 million for the corresponding period of the preceding fiscal year, an increase of 14.8%. These increases in revenue primarily resulted from higher sales in the United States. The end-customer prescription demand resulted in positive growth for most of our products sold in the United States, which was reflected in sales to our major wholesalers as they work towards reaching their targeted inventory levels. Major wholesalers in the United States reduced their inventory levels in fiscal 2005 and fiscal 2006.

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

Revenue is stated net of deductions for product returns, chargebacks, contract rebates, discounts and other allowances of \$17.0 million (18.9% of gross revenue) for the three-month period ended March 31, 2006, and \$9.8 million (13.4% of gross revenue) for the three-month period ended March 31, 2005. Deductions for product returns, chargebacks, contract rebates, discounts and other allowances were \$28.6 million (16.6% of gross revenue) for the six-month period ended March 31, 2006, and \$18.0 million (12.6% of gross revenue) for the six-month period ended March 31, 2005. These increases of total deductions as a percentage of gross revenue are primarily due to an increase in chargebacks and contract rebates reserves. During the quarter the reserve for product returns, chargebacks, contract rebates, discounts and other allowances was increased by \$2.8 million as a result of a refinement in the method used in the calculation for such reserves. The refinement was implemented based on best industry practices as well as additional information available to the Company compared to prior periods.

COST OF GOODS SOLD

Cost of goods sold consists principally of cost of raw materials, royalties and manufacturing costs. Axcan outsources most of its manufacturing requirements. For the three-month period ended March 31, 2006, cost of goods sold decreased \$2.0 million (9.8%) to \$18.5 million from \$20.5 million for the corresponding period of the preceding fiscal year. As a percentage of revenue, cost of goods sold for the three-month period ended March 31, 2006 decreased as compared to the corresponding period of the preceding fiscal year from 32.3% to 25.4%. For the six-month period ended March 31, 2006, cost of goods sold decreased \$0.5 million (1.3%) to \$36.7 million from \$37.2 million for the corresponding period of the preceding fiscal year. As a percentage of revenue, cost of goods sold for the six-month period ended March 31, 2006 decreased as compared to the corresponding period of the preceding fiscal year from 29.8% to 25.6%. These decreases in the cost of goods sold as a percentage of revenue were due mainly to the increases in sales of products with a higher margin and the fact that cost of goods sold for the six-month period ended March 31, 2005 included \$4.7 million related to the write-down of inventory of finished goods for one product line sold in the United States.

SELLING AND ADMINISTRATIVE EXPENSES

Selling and administrative expenses consist principally of salaries and other costs associated with Axcan's sales force and marketing activities. Selling and administrative expenses increased \$2.0 million (9.6%) to \$22.9 million for the three-month period ended March 31, 2006, from \$20.9 million for the corresponding period of the preceding fiscal year. For the six-month period ended March 31, 2006, selling and administrative expenses increased \$4.6 million (11.0%) to \$46.5 million from \$41.9 million for the corresponding period of the preceding fiscal year. The adoption of the new accounting rule concerning the compensation cost for share based awards resulted in an increase in selling and administrative expenses of \$0.8 million (3.8%) for the three-month period ended March 31, 2006 and \$1.7 million (4.1%) for the six-month period ended March 31, 2006. These increases are net of a reduction in expenses of \$2.9 million following the reversal of the pending legal settlements accrual during the quarter. These increases are also due to preparation for additional products to be marketed, additional marketing efforts on our current products, increased distribution cost following the signing of a new agreement with a major wholesaler and consulting fees for information technology implementation and regulatory compliance.

RESEARCH AND DEVELOPMENT EXPENSES

Research and development expenses consist principally of fees paid to outside parties that Axcan uses to conduct clinical studies and to submit governmental approval applications on its behalf as well as the salaries and benefits paid to its personnel involved in research and development projects. Research and development expenses decreased \$1.0 million (12.0%) to \$7.3 million for the three-month period ended March 31, 2006, from \$8.3 million for the corresponding period of the preceding fiscal year. For the six-month period ended March 31, 2006, research and development expenses increased \$1.5 million (10.2%) to \$16.2 million from \$14.7 million for the corresponding period of the preceding fiscal year. This increase was mainly due to the Phase III development of ITAX, acquired in August 2003, for the treatment of functional dyspepsia. Phase III is the most expensive stage of clinical development.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization consists principally of the amortization of intangible assets with a finite life. Intangible assets include trademarks, trademark licenses and manufacturing rights. Depreciation and amortization increased \$0.3 million (5.7%) to \$5.6 million for the three-month period ended March 31, 2006, from \$5.3 million for the corresponding period of the preceding fiscal year. For the six-month period ended March 31, 2006, depreciation and amortization increased \$0.6 million (5.6%) to \$11.3 million from \$10.7 million for the corresponding period of the preceding fiscal year. These increases are mainly due to the amortization of LACTEOL and ADEKs which were reclassified from intangible assets with an indefinite life to intangible assets with a finite life on October 1, 2005.

PARTIAL WRITE-DOWN OF INTANGIBLE ASSETS

Further to budgetary initiatives implemented by the French government, which resulted in the delisting of a number of pharmaceutical products from government formularies and re-pricing of other pharmaceutical products, the Company reviewed the appropriate carrying value and useful life of its French subsidiary's intangible assets. Consequently, during the three-month period ended March 31, 2006, a partial write-down of \$5.8 million was recognized on a French line of products including TAGAMET and TRANSULOSE as the carrying value of the intangible assets associated with these products, totalling \$18.7 million prior to the write-down, exceeded the estimated value of cash generated by these same products.

FINANCIAL EXPENSES

Financial expenses consist principally of interest and fees paid in connection with money borrowed for acquisitions. Financial expenses decreased \$0.2 million (10.5%) to \$1.7 million from \$1.9 million for the corresponding period of the preceding fiscal year. For the six-month period ended March 31, 2006, financial expenses decreased \$0.2 million (5.4%) to \$3.5 million from \$3.7 million for the corresponding period of the preceding fiscal year.

INCOME TAXES

Income taxes amounted to \$3.9 million for the three-month period ended March 31, 2006, compared to \$1.5 million for the corresponding period of the preceding fiscal year. The effective tax rates were 32.1% for the three-month period ended March 31, 2006 and 21.7%

for the three-month period ended March 31, 2005. For the six-month period ended March 31, 2006, income taxes amounted to \$8.2 million compared to \$4.4 million for the corresponding period of the preceding fiscal year. The effective tax rates were 31.7% for the six-month period ended March 31, 2006 and 25.0% for the six-month period ended March 31, 2005. These increases in effective tax rate are due in part to the research and development tax credits, deducted from the income taxes expense, of \$0.5 million or 3.8% of reduction in effective tax rate for the three-month period ended March 31, 2006 compared to \$0.5 million or 7.9% of reduction in effective tax rate for the corresponding period of the preceding fiscal year and of \$1.2 million or 4.6% of reduction in effective tax rate for the six-month period ended March 31, 2006 compared to \$1.1 million or 6.2% of reduction in effective tax rate for the corresponding period of the preceding fiscal year. These increases are also due to the fact that a greater part of our taxable income came from the United States where the income tax rate is higher. The Company is currently being audited by the Canadian Tax Authority, mainly on transfer pricing issues, for fiscal year 2002 to fiscal year 2004.

The income tax expense and corresponding tax rate are summarized in the following tables:

	For the three-month periods ended March 31		For the six-month periods ended March 31	
	2006	2005	2006	2005
Income tax expense	\$	\$	\$	\$
Income tax	4,390	2,049	9,354	5,478
Research and development tax credits	(464)	(546)	(1,195)	(1,081)
Income tax expense	3,926	1,503	8,159	4,397
Income tax rate	%	%	%	%
Income tax	35.9	29.6	36.3	31.2
Research and development tax credits	(3.8)	(7.9)	(4.6)	(6.2)
Effective tax rate	32.1	21.7	31.7	25.0

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

NET INCOME

Net income was \$8.3 million or \$0.18 of basic income per share and \$0.17 of diluted income per share for the three-month period ended March 31, 2006, compared to \$5.4 million or \$0.12 of basic and diluted income per share for the corresponding period of the preceding year. Net income for the three-month period ended March 31, 2006 takes into account the expensing of stock-based compensation which amounted to \$0.9 million after taxes. Had stock-based compensation been recorded in the prior year, the impact to net income for the three-month period ended March 31, 2005 would have been \$0.8 million or \$0.02 per share of basic and diluted income per share thus reducing net income to \$4.6 million or \$0.10 of basic and diluted income per share. The change in net income for the three-month period ended March 31, 2006 resulted mainly from an increase in revenue of \$9.4 million and an increase in interest income of \$0.7 million, which was offset partly by a \$5.0 million increase in operating expenses and an increase in income taxes of \$2.4 million. The weighted average number of common shares outstanding used to establish the basic per share amounts increased from 45.6 million for the three-month period ended March 31, 2005 to 45.7 million for the three-month period ended March 31, 2006, following the exercise of options previously granted pursuant to Axcan's stock option plan. The weighted average number of common shares used to establish the diluted per share amounts decreased from 55.4 million for the three-month period ended March 31, 2005 to 55.2 million for the three-month period ended March 31, 2006.

Net income was \$17.6 million or \$0.38 of basic income per share and \$0.36 of diluted income per share, for the six-month period ended March 31, 2006, compared to \$13.2 million or \$0.29 of basic income per share and \$0.28 of diluted income per share for the corresponding period of the preceding year. Net income for the six-month period ended March 31, 2006 takes into account the expensing of stock-based compensation which amounted to \$1.8 million after taxes. Had stock-based compensation been recorded in the prior year, the impact to net income for the six-month period ended March 31, 2005 would have been \$1.9 million or \$0.04 per share of basic income and diluted income per share thus reducing net income to \$11.2 million or \$0.25 of basic income per share and \$0.24 of diluted income per share. The change in net income for the six-month period ended March 31, 2006 resulted

mainly from an increase in revenue of \$18.5 million and an increase in interest income of \$1.4 million, which was offset partly by a \$12.0 million increase in operating expenses and an increase in income taxes of \$3.8 million.

CANADIAN GAAP

The differences (in thousands of dollars) between U.S. and Canadian GAAP which affect net income for the periods ended March 31, 2006 and 2005 are summarized in the following table:

	For the three-month periods ended March 31		For the six-month periods ended March 31	
	2006	2005	2006	2005
	\$	\$	\$	\$
Net income in accordance with U.S. GAAP	8,322	5,425	17,567	13,179
Implicit interest on convertible debt	(1,226)	(1,120)	(2,455)	(2,243)
Stock-based compensation expense	—	(1,131)	—	(2,431)
Amortization of new product acquisition costs	(12)	(12)	(26)	(26)
Income tax impact of the above adjustments	(105)	135	(268)	140
Net earnings in accordance with Canadian GAAP	6,979	3,297	14,818	8,619

On March 5, 2003, the Company closed an offering of \$125.0 million aggregate principal amount of 4.25% convertible subordinated notes due April 15, 2008. As a result of the terms of the notes, under Canadian GAAP, an amount of \$24.2 million was included in shareholders' equity as equity component of the convertible debt and an amount of \$100.8 million was included in long-term debt, as the liability component of the convertible notes. For the six-month period ended March 31, 2006, implicit interest in the amount of \$2.5 million (\$2.2 million in 2005) was accounted for and added to the liability component.

Since October 1, 2004, under Canadian GAAP, the effect of stock-based compensation has to be accounted for using the fair value method. Under U.S. GAAP, the effect of stock-based compensation has to be accounted for using the fair value method since October 1, 2005.

Under Canadian GAAP, research and development expenses are stated net of related tax credits which generally constitute between 5% and 10% of the aggregate amount of such expenses. Under U.S. GAAP, these tax credits are applied against income taxes.

LIQUIDITY AND CAPITAL RESOURCES

Axcan's cash, cash equivalents and short-term investments increased \$44.1 million (45.2%) to \$141.7 million at March 31, 2006 from \$97.6 million at September 30, 2005. As of March 31, 2006, working capital was \$166.0 million, compared to \$132.0 million at September 30, 2005, an increase of \$34.0 million (25.8%). These increases were mainly due to the cash flows from operating activities of \$45.3 million for the six-month period ended March 31, 2006.

Total assets increased \$28.7 million (4.5%) to \$670.1 million as of March 31, 2006 from \$641.4 million as of September 30, 2005. Shareholders' equity increased \$21.1 million (5.1%) to \$438.7 million as of March 31, 2006 from \$417.6 million as of September 30, 2005.

Historically, Axcan has financed research and development, operations, acquisitions, milestone payments and investments out of the proceeds of public and private sales of its equity and convertible debt, cash flows from operating activities, and loans from joint venture partners and financial institutions. Since it went public in Canada in December 1995, Axcan has raised approximately \$243.0 million from sales of its equity and \$125.0 million from sales of convertible notes. Furthermore, Axcan has borrowed and since repaid funds from financial institutions to finance the acquisition of Axcan Scandipharm Inc. and from Schwaiz Pharma Inc., a former joint venture partner, to finance the acquisition of URSO.

Axcan's research and development expenses totalled \$19.9 million for fiscal 2004 and \$31.9 million for fiscal 2005. Axcan believes that cash, cash equivalents and short-term investments, together with funds provided by operations, will be sufficient to meet its operating cash requirements, including the development of products through research and development activities, capital expenditures and repayment of its debt. Axcan believes that regulatory approvals of future products and extension of product indications, stemming from

its research and development efforts, will significantly contribute to an increase in funds provided by operations. However, Axcan regularly reviews product and other acquisition opportunities and may therefore require additional debt or equity financing. Axcan cannot be certain that such additional financing, if required, will be available on acceptable terms, or at all.

LINE OF CREDIT

Effective September 22, 2004, the Company amended its existing credit facility with a banking syndicate. The amended credit facility consists of a \$125.0 million 364-day extendible revolving facility with a two-year term-out option maturing on September 21, 2008.

The credit facility is secured by a first priority security interest on all present and future acquired assets of the Company and its material subsidiaries, and provides for the maintenance of certain financial ratios. Among the restrictions imposed by the credit facility is a covenant limiting cash dividends, share repurchases (other than redeemable shares issued in connection with a permitted acquisition) and similar distributions to shareholders to 10% of the Company's net income for the preceding fiscal year. As of March 31, 2006, Axcan was in compliance with all covenants under the credit facility.

The interest rate varies, depending on the Company's leverage, between 25 basis points and 100 basis points over Canadian prime rate or U.S. base rate, and between 125 basis points and 200 basis points over the LIBOR rate or bankers' acceptances. The line of credit also provides for a stand-by fee of between 25 and 37.5 basis points. The credit facility may be drawn in U.S. dollars, in Canadian dollars or Euro equivalents. As of March 31, 2006, there was no amount outstanding under this credit facility.

CONVERTIBLE SUBORDINATED NOTES AND OTHER LONG-TERM DEBT

Long-term debt, including instalments due within one year, totalled \$127.1 million as of March 31, 2006 compared to \$127.8 million as of September 30, 2005. As of March 31, 2006, the long-term debt included \$1.0 million of bank loans, \$1.1 million of obligations under capital leases contracted by Axcan's French subsidiary and the \$125.0 million 4.25% convertible subordinated notes due 2008, which were issued on March 5, 2003.

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

The notes are convertible into 8,924,113 common shares during any quarterly conversion period if the closing price per share for at least 20 consecutive trading days during the 30 consecutive trading-day period ending on the first day of the conversion period exceeds 110% of the conversion price in effect on that thirtieth trading day. The notes are also convertible during the five business-day period following any 10 consecutive trading-day period in which the daily average of the trading prices for the notes was less than 95% of the average conversion value for the notes during that period. The noteholders may also convert their notes upon the occurrence of specified corporate transactions or if the Company has called the notes for redemption. On or after April 20, 2006, the Company may at its option, redeem the notes, in whole or in part at redemption prices varying from 101.70% to 100.85% of the principal amount plus any accrued and unpaid interest to the redemption date. The notes also include provisions for the redemption of all the notes for cash at the option of the Company following certain changes in tax treatment.

CASH FLOWS

Cash flows from operating activities decreased \$2.0 million from \$18.1 million of cash provided by operating activities for the quarter ended March 31, 2005 to \$16.1 million for the quarter ended March 31, 2006. Cash flows from operating activities increased \$18.4 million from \$26.9 million of cash provided by operating activities for the six-month period ended March 31, 2005 to \$45.3 million for the six-month period ended March 31, 2006. This increase is mainly due to the increase in net income and the fact that accounts receivable decreased by \$5.6 million and accounts payable and accrued liabilities increased by \$6.9 million during the six-month period ended March 31, 2006. Cash flows from financing activities were \$0.3 million for the three-month period ended March 31, 2006. Cash flows used by investment activities for the three-month period ended March 31, 2006 were \$21.0 million mainly due to the acquisition of short-term investments of \$20.4 million and the cash used for the acquisition of property, plant and equipment for \$0.6 million. Cash flows used by investment activities for the six-month period ended March 31, 2006 were \$14.6 million mainly due to the net acquisition of short-term investments of \$13.4 million and the cash used for the acquisition of property, plant and equipment for \$1.2 million.

Cash flows provided by investment activities for the six-month period ended March 31, 2005 were \$7.8 million mainly due to the disposal of short-term investments of \$11.4 million less the cash used for the acquisition of property, plant and equipment for \$3.6 million.

OFF-BALANCE SHEET ARRANGEMENTS

Axcan does not have any transactions, arrangements and other relationships with unconsolidated entities that are likely to affect its operating results, its liquidity or capital resources. Axcan has no special purpose or limited purpose entities that provide off-balance sheet financing, liquidity or market or credit risk support, engage in leasing, hedging, research and development services, or other relationships that expose the Company to liability that is not reflected on the face of the consolidated financial statements.

CONTRACTUAL OBLIGATIONS

The following table summarizes Axcan's significant contractual obligations (in thousands of dollars) as of March 31, 2006 and the effect such obligations are expected to have on our liquidity and cash flows in future years. This table excludes amounts already recorded on the balance sheet as current liabilities at March 31, 2006 or certain other purchase obligations as discussed below:

	For the twelve-month periods ending March 31,				
	2007	2008	2009	2010	2011 and thereafter
	\$	\$	\$	\$	\$
Long-term debt	1,365	125,601	153	13	–
Operating leases	1,593	1,070	660	16	–
Other commitments	302	475	716	250	–
	3,260	127,146	1,529	279	0

Purchase orders for raw materials, finished goods and other goods and services are not included in the above table. Management is not able to determine the aggregate amount of such purchase orders that represent contractual obligations, as purchase orders may represent authorizations to purchase rather than binding agreements. For the purpose of this table, contractual obligations for purchase of goods or services are defined as agreements that are enforceable and legally binding on the Company and that specify

all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Axcán's purchase orders are based on current needs and are fulfilled by our vendors with relatively short timetables. The Company does not have significant agreements for the purchase of raw materials or finished goods specifying minimum quantities or set prices that exceed its short-term expected requirements. Axcán also enters into contracts for outsourced services; however, the obligations under these contracts are not significant and the contracts generally contain clauses allowing for cancellation without significant penalty except for a sales management services contract included in the above table. As milestone payments are primarily contingent on receiving regulatory approval for products under development, they do not have defined maturities.

The expected timing of payment of the obligations discussed above is estimated based on current information. Timing of payments and actual amounts paid may be different depending on the time of receipt of goods or services, or for some obligations, changes to agreed-upon amounts.

EFFECT OF RECENTLY ISSUED U.S. ACCOUNTING PRONOUNCEMENTS

In December 2004, the FASB issued SFAS No. 123R, "Share-Based Payment". SFAS No. 123R requires all entities to recognize compensation cost for share-based awards, including options, granted to employees. The Statement eliminates the ability to account for share-based compensation transactions using APB No. 25, "Accounting for Stock Issued to Employees", and generally requires instead that such transactions be accounted for using a fair-value based method. Public companies are required to measure stock-based compensation classified as equity by valuing the instrument the employee receives at its grant-date fair value. Previously, such awards were measured at intrinsic value under both APB No. 25 and SFAS No. 123, "Accounting for Stock-Based Compensation". The Company applied the Statement beginning in fiscal 2006 using the modified prospective transition approach. The adoption resulted in an increase in compensation cost of \$2.0 million for the six-month period ended March 31, 2006.

EARNINGS COVERAGE

Under U.S. GAAP, for the twelve-month period ended March 31, 2006, our interest requirements amounted to \$6.1 million on a pro-forma basis and our earnings coverage ratio, defined as the ratio of earnings before interest and income taxes to pro-forma interest requirements, was 8.13 to one.

Under Canadian GAAP, for the twelve-month period ended March 31, 2006, our interest requirements amounted to \$11.4 million on a pro-forma basis, and our earnings coverage ratio was 4.39 to one. The principal difference between the earnings coverage ratios under Canadian GAAP and U.S. GAAP is attributable to the inclusion of implicit interest of \$5.3 million as required by Canadian GAAP.

RISK FACTORS

Axcán is exposed to financial market risks, including changes in foreign currency exchange rates and interest rates. Axcán does not use derivative financial instruments for speculative or trading purposes. Axcán does not use off-balance sheet financing or similar special purpose entities. Inflation has not had a significant impact on Axcán's results of operations. Risks other than those described below can be found in Part III - Business of Axcán, of the Company's Annual Information Form.

FOREIGN CURRENCY RISK

Axcán operates internationally; however, a substantial portion of the revenue and expense activities and capital expenditures are transacted in U.S. dollars. Axcán's exposure to exchange rate fluctuation is reduced because, in general, Axcán's revenues denominated in currencies other than the U.S. dollar are matched by a corresponding amount of costs denominated in the same currency. Axcán expects this matching to continue.

INTEREST RATE RISK

The primary objective of Axcán's investment policy is the protection of capital. Accordingly, investments are made in high-grade government and corporate securities with varying maturities, but typically, less than 180 days. Therefore, Axcán does not have a material exposure to interest rate risk, and a 100 basis-point adverse change in interest rates would not have a material effect

MANAGEMENT'S DISCUSSION

and analysis of financial condition and results of operations

on Axcan's consolidated results of operations, financial position or cash flows. Axcan is exposed to interest rate risk on borrowings under the credit facility. The credit facility bears interest based on LIBOR, U.S. dollar base rate, Canadian dollar prime rate, or Canadian dollar bankers' acceptances. Based on projected advances under the credit facility, a 100 basis-point adverse change in interest rates would not have a material effect on Axcan's consolidated results of operations, financial position, or cash flows.

SUPPLY AND MANUFACTURE

Axcan depends on third parties for the supply of active ingredients and for the manufacture of the majority of its products. Although Axcan looks to secure alternative suppliers, Axcan may not be able to obtain the active ingredients or products from such third parties, the active ingredients or products may not comply with specifications, or the prices at which Axcan purchases them may increase and Axcan may not be able to locate alternative sources of supply in a reasonable time period, or at all. If any of these events occur, Axcan may not be able to continue to market certain of its products, and its sales and profitability would be adversely affected.

VOLATILITY OF SHARE PRICES

The market price of Axcan's shares is subject to volatility. Deviations in actual financial or scientific results, as compared to expectations of securities analysts who follow our activities, can have a significant effect on the trading price of Axcan's shares.

FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements, which reflect the Company's current expectations regarding future events. To the extent that any statements in this document contain information that is not historical, the statements are essentially forward-looking and are often identified by words such as "anticipate", "expect", "estimate", "intend", "project", "plan" and "believe". These forward-looking statements include, but are not limited to, the expected sales growth of the Company's products and the expected increase

in funds from operations resulting from the Company's research and development expenditures. The forward-looking statements involve risks and uncertainties. Actual events could differ materially from those projected herein and depend on a number of factors, including but not limited to the successful and timely completion of clinical studies, the difficulty of predicting FDA or other regulatory approvals, the commercialization of a drug or therapy after regulatory approval is received, the difficulty of predicting acceptance and demand for pharmaceutical products, the impact of competitive products and pricing, costs associated with new product development and launch, the availability of raw materials, the protection of our intellectual property, fluctuations in our operating results and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission and the Canadian Securities Commissions. The reader is cautioned not to rely on these forward looking statements. The Company disclaims any obligation to update these forward-looking statements.

This MD&A has been prepared as of May 2, 2006. Additional information on the Company is available through regular filing of press releases, quarterly financial statements and the Annual Information Form on the SEDAR website.

On behalf of Management,

Steve Gannon
Senior Vice President, Finance
and Chief Financial Officer

Notes to Consolidated Financial Statements

(amounts in tables are stated in thousands of U.S. dollars, except share related data)
(unaudited)

1. Significant Accounting Policies

The accompanying unaudited financial statements are prepared in accordance with U.S. GAAP for interim financial statements and do not include all the information required for complete financial statements. They are consistent with the policies outlined in the Company's audited financial statements for the year ended September 30, 2005 except for the change mentioned in note 2. The interim financial statements and related notes should be read in

conjunction with the Company's audited financial statements for the year ended September 30, 2005. When necessary, the financial statements include amounts based on informed estimates and best judgements of management. The results of operations for the interim periods reported are not necessarily indicative of results to be expected for the year.

2. Change in Accounting Policies

In December 2004, The Financial Accounting Standards Board issued the Statement of Financial Accounting Standards ("SFAS") No. 123R, "*Share-Based Payment*". SFAS No. 123R requires all entities to recognize compensation cost for share-based awards, including options, granted to employees. The Statement eliminates the ability to account for share-based compensation transactions using the Accounting Principles Board Opinion ("APB") No. 25, "*Accounting for Stock Issued To Employees*", and generally

requires instead that such transactions be accounted for using a fairvalue based method. Public companies are required to measure stock-based compensation classified as equity by valuing the instrument the employee receives at its grant-date fair value. Previously such awards were measured at intrinsic value under both APB No. 25 and SFAS No. 123, "*Accounting for Stock-Based Compensation*". The Company applied the Statement beginning in fiscal 2006 using the modified prospective transition approach.

If this change in accounting policy had been applied to the previous fiscal year, the Company's net income, basic income per share and diluted income per share for the periods ended March 31, 2005 would have been reduced on a pro-forma basis as follows:

	For the three-month period ended March 31, 2005	For the three-month period ended March 31, 2005	For the six-month period ended March 31, 2005	For the six-month period ended March 31, 2005
	As reported	Pro-forma	As reported	Pro-forma
	\$	\$	\$	\$
Net income	5,425	4,580	13,179	11,237
Basic income per share	0.12	0.10	0.29	0.25
Diluted income per share	0.12	0.10	0.28	0.24

The estimated fair value of granted stock options for the periods ended March 31, 2006 and 2005 using the Black-Scholes model was as follows:

	For the three-month period ended March 31, 2006	For the three-month period ended March 31, 2005	For the six-month period ended March 31, 2006	For the six-month period ended March 31, 2005
Fair value per option	\$7.67	\$7.45	\$6.61	\$7.09
Assumptions used				
Expected volatility	42%	43%	42%	43%
Risk-free interest rate	4.12%	3.76%	4.28%	4.08%
Expected option life (years)	6	6	6	6
Expected dividend	-	-	-	-

Notes to Consolidated Financial Statements

(amounts in tables are stated in thousands of U.S. dollars, except share related data)
(unaudited)

3. Inventories

	March 31, 2006 \$	September 30, 2005 \$
Raw materials and packaging material	17,008	18,710

Finite life	334,749	45,841	288,908
Indefinite life	112,430	12,417	100,013
	447,179	58,258	388,921

Further to budgetary initiatives implemented by the French government, which resulted in the delisting of a number of pharmaceutical products from government formularies and re-pricing of other pharmaceutical products, the Company reviewed the appropriate carrying value and useful life of its French subsidiary's intangible assets.

During the three-month period ended March 31, 2006, a partial write-down of \$5,800,000 was recognized on a French line of products including TAGAMET and TRANSULOSE as the carrying value of the intangible assets associated with these products exceeded the estimated value of cash generated by these same products.

The cost of the products LACTEOL and ADEKs has been transferred from intangible assets with an indefinite life to intangible assets with a finite life following changes in the regulatory rules applicable to these products and resulting in the modification of their useful life. The net cost of these products as of October 1, 2005, which amounted to \$13,520,565, is therefore amortized over a 15-year period.

d) Income per common share

The following tables reconcile the numerators and the denominators of the basic and diluted income per common share computations:

	For the three-month period ended March 31, 2006	For the three-month period ended March 31, 2005	For the six-month period ended March 31, 2006	For the six-month period ended March 31, 2005
	\$	\$	\$	\$
Net income available to common shareholders				
Basic	8,322	5,425	17,567	13,179
Interest and amortization of deferred debt issue expenses relating to the convertible subordinated notes, net of income taxes	1,069	1,055	2,190	2,134
Net income available to common shareholders on a diluted basis	9,391	6,480	19,757	15,313

Notes to Consolidated Financial Statements

(amounts in tables are stated in thousands of U.S. dollars, except share related data)

(unaudited)

6. Financial Information Included in the Consolidated Operations (Continued)

d) Income per common share (Continued)

	For the three-month period ended March 31, 2006	For the three-month period ended March 31, 2005	For the six-month period ended March 31, 2006	For the six-month period ended March 31, 2005
Weighted average number of common shares				
Weighted average number of common shares outstanding	45,712,790	45,599,780	45,711,291	45,582,668
Effect of dilutive stock options	578,944	919,095	504,975	860,331
Effect of dilutive convertible subordinated notes	8,924,113	8,924,113	8,924,113	8,924,113
Adjusted weighted average number of common shares outstanding	55,215,847	55,442,988	55,140,379	55,367,112
Number of common shares outstanding as at May 1, 2006	45,769,214			

Options to purchase 883,450 and 271,200 common shares were outstanding as at March 31, 2006 and 2005 respectively but were not included in the computation of diluted income per share for the six-month periods ended March 31, 2006 and 2005 respectively because the exercise price of the options was greater than the average market price of the common shares.

The \$125,000,000 subordinated notes are convertible into 8,924,113 common shares. The noteholders may convert their notes during any quarterly conversion period if the closing price per share for at the least 20 consecutive trading days during the 30 consecutive trading-day period ending on the first day of the conversion period exceeds 110% of the conversion price in effect

on that thirtieth trading day. The noteholders may also convert their notes during the five business-day period following any 10 consecutive trading-day period in which the daily average of the trading prices for the notes was less than 95% of the average conversion value for the notes during that period. Finally, the noteholders may also convert their notes upon the occurrence of specified corporate transactions or, if the company has called the notes for redemption. On or after April 20, 2006, the Company may at its option, redeem the notes, in whole or in part at redemption prices varying from 101.70% to 100.85% of the principal amount plus any accrued and unpaid interest to the redemption date. The notes also include provisions for the redemption of all the notes for cash at the option of the Company following certain changes in tax treatment.

e) Employee benefit plan

A subsidiary of the Company has a defined contribution plan ("The Plan") for its U.S. employees. Participation is available to substantially all U.S. employees. Employees may contribute up to 15% of their gross pay and up to limits set by the U.S. Internal

Revenue Service. For the six-month period ended March 31, 2006, the Company made matching contributions to the Plan totalling \$222,262 (\$272,185 in 2005).

7. Contingencies

The Company's subsidiary, Axcan Scandipharm, had been named along with other third parties, as defendants in several legal proceedings related to the product line it markets under the name ULTRASE. In addition, the product line's manufacturer and other defendant companies had claimed a right to recover amounts paid defending and settling these claims. This claim was based on contractual and indemnity issues and the parties had agreed to settle their dispute

through binding arbitration. The Company accrued \$2,900,000 to cover any future settlements in connection with the indemnification claim and the lawsuits discussed above. Following a series of decisions rendered by the arbitrator in favour of Axcan Scandipharm, the Company revaluated its exposure and this accrual was reversed in the three-month period ended March 31, 2006, thus reducing the selling and administrative expenses by the same amount.

Notes to Consolidated Financial Statements

(amounts in tables are stated in thousands of U.S. dollars, except share related data)
(unaudited)

8. Subsequent Event

In connection with a reorganization of its international operations due to budgetary initiatives implemented by the French government, the Company has undertaken steps which seek a reduction of its current workforce in Europe. To this end, on May 2, 2006, the Company's French subsidiary communicated a reorganization plan

to the employee-representatives in France aimed at reducing its workforce. If this plan is implemented, the Company anticipates recording one time restructuring charges of approximately \$1,500,000 during the three-month period ending June 30, 2006.

9. Summary of Differences Between Generally Accepted Accounting Principles in the United States and in Canada

The consolidated interim financial statements have been prepared in accordance with U.S. GAAP which, in the case of the Company, conform in all material respects with Canadian GAAP, except as set forth below:

	For the three-month period ended March 31, 2006	For the three-month period ended March 31, 2005	For the six-month period ended March 31, 2006	For the six-month period ended March 31, 2005
